DETAILED ACTION

Per Applicant's Request for Continued Examination:

Claims 31 and 51-53 have been amended. Claims 1-30 and 36-50 have been cancelled.

Claim 54 is new.

Claims 31-35 and 51-54 are pending.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/12/2006 has been entered.

Response to Arguments

2. Applicant's arguments, see Remarks pages 6-8, filed 1/12/2006, with respect to 31 have been fully considered and are persuasive. Therefore, the 35 U.S.C. 102(b) rejection of 31-35 and 51-53 has been withdrawn.

Claim Rejections - 35 USC § 112

3. **Per claims 51-53**, the corrections to the claim language have been accepted by the Examiner. The rejection under 35 U.S.C. 112, second paragraph, is therefore withdrawn.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. **Claims 31-35 and 51-54** are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 4-6, 24-26, 28-31, 35-41, 52, 68, 82 and 83 of copending Application No. 09/770767. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter of the conflicting claims is directed to the same method of generating a compressed video stream and manipulating commands that are responsive to the limitations of client's remote display device, in order to modify the display of the compressed video stream by moving an element, replacing an element, changing a property of an element or removing an element. Furthermore the modifications of the display elements are directed to the same features of bandwidth restrictions, manipulating colors, using different fonts, reducing and/or synchronizing flashing

rates of colors and cursors, reducing animation rates of animated objects, low-pass filtering to reduce display resolution, reducing scrolling resolution, and changing an element to a similar element that is easier to compress.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

7. **Claim 54** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "easier to compress" in line 6 of claim 54 is a relative term which renders the claim indefinite. The term "easier to compress" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Correction is required.
